GOOD QUALITY MEANS PROFIT TO YOU
POOR QUALITY MEANS LOSS TO YOU

No better trees can be bought no matter how much you pay.

We are the only nursery company combining good quality with low prices.

Inducements that make our business:
1. We pay the freight to any station in the U.S. if your order amounts to $10.00 or more.
2. We give valuable premiums with orders. See list.
3. We make a special box, out of new lumber and strap irons, for each freight order.
4. We paper line all boxes to keep out the wind and frost.
5. We replace all stock that dies at one-half price, each rate.
6. Sell at wholesale and ship direct to planter.
7. Sell 30 trees of one sort at the 100 rate, 300 of one sort at the 1000 rate.
Twenty-Second Annual Catalog

Our Nursery Catalog is Published every December. Always Free for the Asking. We Pay Freight on $10.00 Orders, to Any Station in the United States.

A High Grade Watch for Orders Over $30.00.

The Defiance (16-size, regular model), is full stem wind and stem set and is thoroughly up-to-date in every way. Case is 16-inch in size, the hands for men and boys, beautifully finished in polished nickel and with a choice-fitting snap back that is practically dust and moisture proof. We will give a lady's watch, "The Mile," if preferred.

A Kodak With a $35.00 Order.

This is the genuine Eastman product, the finest in the world. It is simple in operation, but absolutely accurate. Made the very best, imitation leather cover and nickel trimmings. Will take both snap shots and time exposures. It is always in focus and anyone can get good results with it. The watch and camera are sent by mail at once, as soon as the order is received at this office.

SPECIAL ADDITIONAL PREMIUM FOR ORDERS WHICH REACH US ON OR BEFORE MARCH 1ST.

Five per cent of the total of the order may be taken in stock.

PREPAID FREIGHT—$10.00—We Pay the Freight—$10.00

If your order amounts to $10.00 or over, we pack and box free, and pay the freight to any freight station in the United States.

We give Premiums with all orders over three dollars whether we pay the freight or whether the customer pays freight.

If you prefer a ten-dollar order to go by express, we will pay as much on the express as the freight would be. This scheme has proven very satisfactory and we advocate its use. Free shipments take a discount of 20 per cent from regular merchandise rates. We have the Wells Fargo, United States, Adams, Northern, Great Northern and Southern Express Companies.

Packages of forty pounds or less generally go just as cheap by express as by freight. It happens sometimes, through our or the railroad agent's mistake, that the freight on a box is not prepaid, when it should be. In such case, please pay the freight, send in agent's receipt and we will remit you the amount.

CLUB OFFERS.

If you do not want enough trees to get the freight prepaid, get some of your neighbors to club with you, and we will tie and label each order separately and ship all together in one box, and prepays freight, provided the several orders amount to sums as above.

YOUR WANT TO START RIGHT.

The growing importance of the Galbraith Nurseries is fully demonstrated by the fact that our business increases each year. Our customers come again and bring their friends with them, because we sell them our best products and the best that can be grown. We never regard the present transaction the last we are likely to have with them, but we regard it as a preliminary to future business. Our system of Direct to the Planter has proven to be of the highest efficiency in business. In every step, you have the goods handled and exposed by local men. Your goods come to you in a box of your own and are not exposed from the time they leave us until you open the box. Small profits and large sales has built up our immense business.

PREMIUMS.

We give the following Premiums for Cash with the Order.

Premium No. 3.

We give this Premium with orders over $3.00 and under $5.00.

1 Pkt. Lettuce
1 Pkt. Radish
1 Pkt. Turnip
1 Pkt. Cabbage
1 Pkt. K. Radish
1 Pkt. Poppy

Premium No. 5.

We give this Premium with orders over $5.00 and under $7.00.

1 Pkt. Radish Early
1 Pkt. Radish Late
1 Pkt. Lettuce
1 Pkt. Cucumber
1 Pkt. Tomato
1 Pkt. Onion
1 Pkt. Cabbage
1 Pkt. Carrot

Premium No. 7.

Free with orders over $7.00 and under $12.00.

Same as No. 5, and 10 Choice Grain Vines added to it. The seeds will be mailed at once and the vines will go with the order.

Premium No. 12.

Free with orders over $12.00 and under $20.00.

Same as No. 5, and 20 Choice Grape Vines added to it. The seeds will be mailed at once and the vines will go with the order.

Premium No. 20.

Free with orders over $20.00 and under $30.00.

Same as No. 5, and 30 Choice Grape Vines added to it. The seeds will be mailed at once and the vines will go with the order.

We doubt, we know, the best planter knows and demands the best fruits. Their taste is educated to the best and the best they must have. The best you must plant in order to get the business and PROFIT.

General Information

ACKNOWLEDGEMENT OF ORDER.

As soon as your order is received at this office, it is numbered and entered as a copy machine in duplicate, one copy is for ourselves, the other for you. It is mailed to you at once. Examine this copy closely and see that it has been correctly ordered, and examine the order and see that everything has been copied exactly as you ordered it. (Customers should keep copy of their order.) If anything is wrong, advise us immediately. If you do not receive this copy within a week, (according to distance from Fairbury), please notify us.

SHIPPING.

When we send your order we notify you the day it is sent, whether by freight or express, enabling you to be on the lookout for it, avoiding delay.

PACKING.

We pack in rich, damp moss and shingle tow in strong boxes, paper lined, or bales sufficient to protect the trees until they get into your hands.

DIRECT DEALINGS.

When you deal direct you avoid a great deal of trouble as well as extra expense to yourself, and these things are not carefully considered by many.

Directions for Transplanting, Care of Stock, Etc.

Care of Stock on Arrival—Upon arrival place the box or package, place it in a shed, barn or cellar away from sun, take off the cover and thoroughly wet down with water and allow it to stand twelve hours or over night before removing in soil. (Excepting Raspberry tips and Strawberry plants, which should be at once heeled in soil.) Then make ready a trench fourteen inches deep and as soon as stock is removed from the package, heel it in this trench, giving the roots plenty of mellow soil, well pressed down with the feet. If soil is dry, moisten it with water after heeling in; the trees are then ready for planting and should only be taken out as needed. If frozen, no water should be applied, but they should at once be buried in earth until all frost is out, and they will not be injured.

Soil—Should be high and well drained, either natural or artificial, by means of tile drainage. Low land, continually saturated with water will not do. It must be deep and cleared and in perfect condition. Never plant fruit trees in sod. The land should be in as good condition as for a crop of wheat or potatoes. If any crops are grown in the young orchard let it always be a good crop and plant nothing nearer than four feet each side of the tree. If you want trees to grow well, be vigorous and strong, you must give them plenty of food and good cultivation until August 1st, when all cultivation should cease, to allow new wood to thoroughly ripen up before cold weather, which it will not do if kept growing by cultivation after that date.

Pruning.—Is most important. In digging, more or less roots are lost of necessity. The top must be cut back to the even up for loss of roots. Leave only four or five branches and cut these back to four or five buds. Peaches are best trimmed to a whip and cut back to not more than two or three feet high. Remove all the broken roots and branches and with a sharp knife cut the ends of the roots back to clean, healthy wood. This helps to start root growth. Fibres occupy the relation to the roots that leaves do to the branches, they die and are succeeded by another lot yearly, and are of no more value to the roots than dead leaves would be to the branches, so prune plenty of leaves and small branches and clean roots, and the less fibres the better.

Planting—Make holes plenty large, so as not to crowd the roots. Use surface for filling in, and plant as firm as possible, pressing soil well down with the feet. See that roots are well spread out and soil firmly around them—don’t hurry the job, do it well, and success is certain. After planting, each tree should be well mulched for two or three feet out with coarse manure. This prevents drying and it is better than watering. The trees should not be long exposed to sun and air. Never put any manure in the holes with the roots. It causes decay.

NO. OF PLANTS PER ACRE AT GIVEN DISTANCES.

To ascertain the number of plants required for an acre at any given distance, divide 48,560 (the number of sq. ft. In an acre) by the distance between the plants in the rows multiplied by the distance between the rows.

EXAMPLE: Plants set in rows 4 ft. apart with the plants 2 ft. apart in the rows, gives each plant 8 sq. ft.; 48,560 divided by 8 gives 5,445 plants per acre.

This accounts for nearly all our articles bearing a lower price than are quoted by other firms; you save that excessive commission paid to that agent; get your goods in a box or bale with the roots and tops carefully wrapped in straw and moss, and they are protected perfectly, so no matter how far you live from the R. R. station, your goods are not opened nor exposed to sun and wind, but the whole package is delivered at the orchard thoroughly protected. This means you have "started right" in beautifying your home surroundings.

TERMS—Cash with orders, except when parties wish goods sent C. O. D. by express. In such cases one-third of the amount must be sent with the order, and balance paid to the express agent when the goods are received by the purchaser.

REFERENCES—Fairline Bank, capital and surplus $115,930.00, Fairbury, Neb., or R. G. Dun's Report.

HOW TO SEND MONEY.

Send money by Bank Draft, Express Money Order, Postoffice Money Order, Registered Letter or by private check. When Postage stamps are sent, 1 and 2 cent preferred.

Orders should be in early, whether for fall or spring planting. We have time to handle early orders in the best manner possible. Late orders reach us after our assortment is more or less broken. (See special premiums for early orders.)

Calhan, Colo.

The Galbraith Nursery Co., Fairbury, Neb.

Dear Sirs:—The trees received in fine shape, and many thanks for the grape vines. Yours truly,

BERT HARTMAN.

Botkins, Ohio.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—Received order all O. K. I am well pleased and thank you for your premium and careful packing.
ONE YEAR OLD APPLE TREES are rapidly growing into favor. Undoubtedly they are the best for large plantations; the set back caused by transplanting is less, they live better, grow more rapidly, cost less to buy, are easier planted and can be shaped to suit your particular taste. In a small family orchard, probably the 1-year branched tree is more satisfactory, because it is more showy, but it will not come into bearing any quicker than the 1-year-old tree.

The idea that a 2-year-old tree comes into bearing a year earlier is wrong—on the average there is no difference.

We recommend them to all planters. Whether you are going to put out a family orchard or a commercial orchard, As said before, they grow rapidly and can be trimmed and shaped to suit the planter.

All Apple Grafted on Whole Root French Seedlings.

WINTER APPLES.

Baldwin—Large, roundish; skin deep red; flesh juicy, crisp, sub-acid; good flavor; very vigorous; productive. The best all round winter apple for New England. Is a fall apple in the West and South.

Ben Davis—Superior commercial apple. Large, handsome, striped; productive.

Gano (sometimes called Black Ben Davis)—It was named by the Missouri Valley Horticultural Society in honor of its president, W. G. Gano. The fruit is bright red on yellow ground (no stripes); large; oblong, tapering to the eye; surface smooth, polished; dots minute; basin shallow, sometimes deep; eye large, cavity deep, brown in color; stem medium to long; core medium. Season January to April. Tree healthy, vigorous, hardy, an annual, annual and prolific bearer.

Jonathan—Medium red; very fine eating apple. The standard of quality. The best family apple, and commanding highest price in market. You can sell Jonathans when the market is flooded.

Little Romanite (Gilpin Carthouse)—Tree very hardy and productive. Fruit of medium size; round; skin very smooth and handsome, streaked with deep red and yellow; flesh yellow, firm, rich, becoming tender in spring; good, vigorous. February to June.

Longfield—One of the imported Russian varieties; early and abundant bearer; thickly covered with red stripes; decided flush on the sunny side; rich, sprightly, sub-acid. December to March.

Mammoth Black Twig—Tree a fine, upright, spreading grower; large bearer, holds fruit well; looks much like Wine Bap; one-third larger; vigorous, excellent keeper.

Mann—Medium to large, often with a shade of brownish yellow on red where exposed; juicy, mild, pleasant. Tree very hardy, upright grower. January to April.

McIntosh Red—A very fine apple of tidal fame: class; hardy, large, dark red; flesh white, very tender; splendid quality; a prolific bearer. November to February.

Missouri Pippin—A fine apple; medium to large; pale yellow at blossom; light and dark red, and covered with small white dots on surface. January to March.

Newtown-Pippin—Large yellow, highly flavored, globular, sweet and highly aromatic; fine dessert apple. Commands highest price on all markets; does not do so well in all sections, bears well in Nebraska and the northwest, some parts southeast. Ripens with York Imperial.

Northern Spy—Too well known to need description. Crisp, tender, high quality; fine shape; beautiful coloring; red, usually striped; sub-acid. Takes 8 to 10 years to come into bearing, but very productive after that. November to March.

Northwest Greening—Yellow, smooth, hardy, resembling Grimes' Golden; fine keeper.

Rawle's Janet—Medium size; round; greenish yellow, striped with red, crisp, rich, Juicy, hardy, slow grower. February to May.

R. I. Greening—Large; greenish yellow; flesh yellow, fine grained, tender, crisp, Juicy, sub-acid; fine for cooking; very productive. November to March.

Stayman's Winesap—It is one of our best Quality Apples. Seedling of the old Winesap, but much better. Fruit nearly twice as large, much better quality, very fine grain, crisp, tender and juicy. It excels many others as a keeper. It is very hardy, a strong grower and very productive. A fast grower, foliage perfect, root system strong, will grow on poor land where the old Winesap would die. This apple will make you money. Hangs till November, large to very large, somewhat cone-shaped, completely covered with dark red, indistinctly striped, sub-acid.

Spitzenberg (Aesopus)—Bright red, striped deeper red, firm, sub-acid, quantity the best. One of the best and good market apple. Does well in certain sections only. Profitable in northwest.
APPLE TREE

Properly Pruned and Cared For

Roman—Stem—Fruit medium; whitish-yellow, splashed with russet; flesh tender, juicy, rich, musky flavor; fine dessert apple; moderate. November and December.

Rome Beauty—Large size; yellow, shaded with bright reddish-yellow; juicy, sub-acid. Very valuable in the Rocky mountains; will keep till March, but loses flavor; a young, heavy bearer. October to March.

Talman Sweet—Medium; pale whitish-yellow; flesh white, fine grained; very hardy and productive. The best winter sweet apple for home and market. November to March.

Wine Sap—Medium size; handsome dark red; sub-acid, very juicy. Favorite in West and Southwest. December to May.

Wolf River—Extremely hardy; fine for West and North; large, handsome; white in flesh; pleasant sub-acid; productive.

York Imperial—Medium, oblate; white, shaded with crimson; flesh firm, crisp, juicy and sub-acid. A good bearer and keeper; one of the best winter apples; moderate. November to April.

Wagner—Medium to large, red, quality fairly good. Does best in the northwest; ripens with the Spitzenburg.

AUTUMN APPLES.

Duchess—Very hardy, early and very abundant bearer; large; red, striped with red on yellow background. Best known Russian sort. An apple of great merit. August and September.

Fameuse—Popularly called Snow Apple. Medium size, slightly ovate; whitish ground, beautifully striped with deep red; flesh very white, juicy. Tree very hardy. Valuable for the months of October and November.

Hass—Medium and large; greenish skin striped with red; sub-acid and juicy; flesh white, of fine quality; early and abundant bearer. September and October.

Maiden Blush—Large, oblate; pale yellow, with red checks; flesh white and tender; pleasant, sub-acid flavor. September.

Plumb's Cider—Large size, oval; striped; tender, juicy, sub-acid. Tree very hardy, vigorous, and productive. Good Northern apple.

Rambo—Medium; yellow, streaked with dull red, dotted; mild, tender; productive; good eater. October to December.

Strawberry—Medium; streaked with red; tender, sub-acid; vigorous. September.

Utter's Red—Large, round; whitish and striped; very beautiful and excellent; sub-acid. Tree vigorous, hardy, productive; requires dry soil; of great value North. September and October.

Wealthy—Fine quality; good all purpose apple. Hardy and very productive; light yellow shaded with deep red; tender, juicy, sub-acid; does well in all sections. October to December. For quick returns W. T. Macoun of the Ontario Experiment Station planted Wealthy apple trees ten feet apart and forced them into early bearing. The plan was profitable. When the trees began to crowd they were pruned back severely. The net returns from this closely planted orchard in 1906 were $103.13 per acre. This brings the average annual profit per acre since the orchard was planted, up to $59.03 per acre.—Fruit-Grower.

SUMMER APPLES.

Benoni—Medium, roundish; pale yellow shaded with crimson; juicy, tender, sub-acid. August.

Bismarck—Tree is of short, stocky growth; thick, healthy foliage; can be grown in pots for ornamental purposes; it is very beautiful, entirely new in its remarkable quality of producing crops on young trees, seldom falling to bear when trees are 2 years old. 2-3 ft., 20c; 3-4 ft., 25c each.

Cooper's Early White—Large, round, pale yellow, with faint blush; flesh white, crisp and sprightly; a Western apple.

Early Harvest—Medium, oblong, straw color; very early; productive; sub-acid. July and August.

Early Pennock—Large, striped with deep red; tender, sub-acid, good grower, productive, fine quality. August.
CRAB APPLES

Nursery Row—2-Year Apple Grafts

Red Astraean—Large, roundish, nearly covered with deep crimson, overspread with a deep bloom; juicy, spicy, beautiful, productive. Last of July.

Lievland Raspberry—Russian origin; clear white, shaded crimson; most beautiful apple; flesh, white, hardy, long lived, succeeds well North and South. Ideal for home use. Juicy and very sweet. July and August.

Prices Same as Standard Sorts.

Florence—We consider this the most valuable crab on the list; early, large, prolific; youngest bearer. Striped and mottled crimson and yellow. Originated by P. M. Gideon in Minnesota, and tree is of extreme hardiness, growing large and shapely.

General Grant—Tree a vigorous and upright grower; fruit large, red to very dark red; flesh white, tender, mild, sub-acid; excellent for dessert; free. October.

Hydlop—Large, produces in clusters; deep crimson and bluish bloom; popular on account of its beauty, productiveness and hardiness. September and October.

Martha—A seedling of Duchess of Oldenburg, which originated in Minnesota. Earlier than the Transcendent; very ornamental as well as a fine fruit; bears in profusion every year. September and October.

Shield's Crab—Erect, vigorous grower; fruit in thick clusters resembling the Transcendent; one of the best growers; never blights. You can make no mistake in ordering this variety.

Whitney No. 20—Very choice variety; upright grower; very large fruit nearly as large as Red June; fine for cooking and eating; sub-acid, pleasant, light green, background striped with red. August.

DWARF APPLE TREES.

Dwarf Apple Trees—We are introducing this as a novelty, but we feel sure that it will soon take a place as a profit getter and a valuable commercial tree. They require but about one-fourth the space of Standards. Mature in four years. Grows only six feet high. Puts strength into fruit instead of wood. Thrive wherever Standards grow and sometimes where Standards fail. Trees are budded on French Paradise and Doucin stalks. An ideal tree for town planting. We can supply most any variety.

One year old. Price, each 25 cents.
We have only the best varieties, the kind that bear annually, and are of the finest quality. A variety of characteristics may be found in those described below. The cherry is a beautiful as well as useful tree. Scarce- ly any ornamental tree is more beautiful. We could add to the list given here, but it would be at a loss of quality. You cannot go wrong in trying these tried popular varieties. The cherry is the most neglected of all important fruits which succeed in the U. S. It is a delicious and refreshing fruit and should be much more widely planted. It is always in demand and the market is rarely overstocked.

Early Richmond

**SWEET CHERRIES.**

Bing—Oregon origin. One of the most profitable on the Pacific coast; very large, dark brown, almost black, firm, sweet splendid shipper. July 15th.

Black Tartarian—Old favorite; upright, dense grower; large heart-shaped, black, tender, juicy, fine quality. July 1.

We also have Schmidt's Bizarreau, Windsor, Napoleon, Centennial and Yellow Spanish. Prices same as the sour varieties.

**SOUR CHERRIES.**

Dyehouse—Early and sure bearer; ripens same time as Early Richmond; finer quality; equally productive. Don't fail to get it.

Early Richmond—Medium size; very light red; melting, juicy; acid flavor. There is no better cherry. Ripens first of June; bears abundantly every year. Does best of all in any climate.

English Morello—A late variety; always satisfactory; very dark red; acid, juicy, fine quality; very productive. Middle of July.

Large Montmorency—Large; dark red; acid; larger than Early Richmond and ten days later; splendid bearer. Last two weeks of June. All the good qualities of the cherry; as hardy as Early Richmond.

Ostheim—Hardy; red; flesh reddish, juicy, tender, sub-acid; valuable in the North. July.

Wragg—Comes to us from Iowa. Is very hardy, vigorous and productive; medium size, dark red and of fine quality. Late.

Other good varieties we handle are Montmorency-Ordinaire, Louis Phillippe and Late Richmond.

Baldwin—The introducer of this fine cherry describes it as follows: "The tree is an upright grower more inclined to be round than otherwise, a very rank, vigorous grower. Fruit is very large, most perfectly round, ver; dark, yet almost transparent; flavor slightly sub-acid.

A new introduction of exceptional merit; a cross between a Sand Cherry and Miner Plum; a fine grower and
Cherries—Continued

Beautiful tree. Fruit about an inch in diameter, and as much a plum as it is a cherry. Cherry is oblong, slightly flattened. Flavor peculiar to itself. Perfectly hardy in all sections of the United States.

Price of Compass Cherry-Plum.

We have other varieties than listed here.

This is one of the very best fruits we have. It far exceeds the apple in flavor. Most varieties are good bearers. They should be planted 20 feet apart. The tendency of the pear root is to grow straight down, therefore the hole should be dug deep and refilled to the proper depth with loose earth. Cut back the long shoots every year about half and you will have no trouble in raising plenty of pears.

*Clapp’s Favorite—Very large; yellowish green to full yellow; when fully ripe is marbled, with dull red in the sun and covered with small russet specks; a spieddell pear. Earlier than the Bartlett.

*Duchess—Very large; of good quality; greenish-yellow. One of the very best as a dwarf. Tree hardy. Ripens end of September. (See cover.)

Flemish Beauty—Large; juicy, rich in flavor; very hardy and deservedly popular. September and October.

Howell—Large yellow, with red cheek; rich, sweet, melting; early bearer, productive. September and October.

Idaho—Has many excellent characteristics; is a strong, vigorous grower; as hardy as Flemish Beauty; very productive, large size, splendid keeper, good shipping qualities. We have kept fruits over two weeks received from Idaho.

Kiefer—Large in size, handsome in appearance; splendid keeper, and therefore a popular and profitable market variety. October and November. Bears well in Nebraska, Kansas and Oklahoma.

Koonce—From Southern Illinois. Has been thoroughly tested in orchards for several years. Tree a strong, upright grower like the Kiefer. Very hardy, producing good crops when all other varieties were killed by frost. Fruit medium to large, with carmine cheeks; first class quality; ripens early; no rotting at core. July.

*Louis Bonne—Good size; greenish-yellow, with bright check. September and October.

*Seckel—Small size; yellowish-brown, red cheek; melting, buttery; none better. September and October.

*Rosney—Ripens about two weeks after Bartlett; average size, excellent keeper and shipper; uniform shape and color, handsome, creamy skin with crimson blush; juicy, sweet and tender; hardy and productive; good shipper. August and September.

*Wilder—Smal to medium, bell-shaped; yellow, shaded carmine; flesh whitish-yellow, fine grained, tender, sub-acid; vigorous grower, early and annual bearer; very productive, good quality; one of the best early varieties. Early August.

Prices on Anjou and Bartlett.

The larger grades are exceedingly scarce; large orders are requested to use the smaller grade if possible.

*Anjou—Large, buttery, melting, rich, vinous. The best late fall and early winter variety, October to January.

*Bartlett—Large size; often with a beautiful blush on the sunny side; buttery, very juicy and highly flavored. August. Very popular variety.

Dwarf Pears

W. H. Green, in the Rural New Yorker, December 29, 1894, says his Dwarf Duchess Pears paid him more than twelve times as much as his apples, and there was more money in pears at $1.00 per barrel than apples at $2.00.

Cultivation—Plant deep, with juncture of bud and stock fully six inches below the surface. Every year the new growth must be cut back one-third and keep the top of tree open. Pinching top buds in the summer will produce fruit buds. Let them branch close to the ground, keep clean until well established. Plant 15 feet apart each way.

Four Dwarf Pear Trees by mail, postpaid, $1.00.

Varieties none as the standard pears. Those that do best as dwarfs we mark with a star *.)
Peaches with proper care can be grown without difficulty in many states where they are not raised at all, or on the most limited scale. In the Central West, in such states as Kansas and Nebraska, peaches grow that cannot be surpassed in quality anywhere, and more of them should be grown.

We have several sorts that in our hands, and in the hands of our customers, have proved to be as hardy as full crops.

But a knowledge of the peach's requirements is necessary in order to get the best results. They require a previous season's growth, and this makes it absolutely necessary to prune and let in light and air, and keep the trees in reduce the stem about one-third, and cut the branches more quickly than the peach, and with no fruit is intelligent.

We mark the hardest sorts with a star (*).
Hill's Chill—Medium size, skin dull yellow, hardy, productive. Last of September. Free.

Lemon Cling—Large size, yellow color with a red cheek. September. Cling.

Mountain Rose—Large size; whitish skin, richly splashed with light and dark red; flesh white and delicious in taste; early, right after Hale's Early. We have fruited it and recommend it. First of August. Free.

Rivers (Early Rivers)—Large peach, light straw color, with delicate pink cheek; flesh juicy and melting with rich flavor. July 29th. Semi-free.

Salway—Late Peach; the fruit is large, roundish, yellow, with rich, marbled brownish-red cheek; flesh yellow, firm, juicy, rich, sugary. Showy market peach. Is very promising; finest in the world for canning. October. Free.

*Stump of the World—Very large size, roundish; skin white with light red cheek, flesh white, juicy, fine quality. Last of September. Free.

Triumph—Ripens with Alexander, blooms late; sure and abundant bearer; the only real early peach with yellow flesh. July 10th. Almost a freestone.

*Wagner—Fair size; fruit of good quality; flesh bright yellow; skin golden yellow with red cheek. Tree exceeding hardy and longlived, yielding well when most varieties fail to bear. Fine peach for canning. Free. September 10th.

Waddell (Free)—Commended by J. H. Hale of Georgia. Very hardy, moderate grower, low and spreading; creamy white with blush; flesh white, juicy, very popular. July 20.

O. M. Free—Large, pale, yellow, deep red cheeks, rich and good. One of the best. August.

Muir, Philippi, Lovell—Pacific coast varieties. We have a good supply of these excellent sorts in the 3-4

Quinces

Quinces are not grown as widely as they deserve. They are profitable year after year. The tree is hardy and compact, requiring very little space. Bears early and regularly, and is prolific. It is a favorite fruit for canning, particularly with other fruit. When put up in the proportion of about one quart of quinces to four quarts of other fruit, it gives a delicious flavor. As a market fruit it is growing rapidly in popularity. Our quinces are of the choicest varieties and certain to please you.

2 to 2 feet, 1-year ........................................ $ 20
2 to 4 feet, 1-year ........................................ $ 35

VARIE Ti ES.

Champion—The fruit is larger on the average than the Orange; more oval in shape; equals it in quality; is a splendid keeper; bears very young; ripens late.

Meech—Large fruit; bright orange color; of great beauty and delightul fragrance; cooking qualities are unsurpassed. The tree is vigorous and exceedingly productive.

Orange—Popular variety; large fruit; bright yellow; of fine flavor.

Red—An Orange seedling; much larger; of same form and color; prolific.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—Received shrubs March 27th, which are doing fine, also Concordos you sent me. I thank you very much for the same.

HATTIE WALTHAM.

Jersey City, N. J.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—Today I received Tree Rose Order No. 424 in first class condition. When I removed the packing I found a bunch of other plants, for which I send my heartiest thanks. Also accept thanks for your prompt shipment. Yours very truly.

STEPHEN J. TRETTER.

Eiberta Peaches

and 1-5 foot grade. Price same as other varieties.

We can supply Seedling Peach trees from the very choicest fruits at the following prices:

Dear Sirs:—The box of fruit trees arrived yesterday and as far as I can see in fine shape. Some garden seeds also came last week. Many thanks for the same. Yours very truly,

L. W. KNOTTS.

Ottawa, Ohio.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I am well pleased with the fruit trees that I have received from you in the last year and all the rest are too. I want one of your books as soon as I can get it. Yours truly,

LEWIS NUTTBRINK.

White Cloud, Kans.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I received the shipment of live trees which you sent me and am well pleased with them. Yours very truly,

MRS. SUSAN A. MARCH.
This favorite fruit can be grown successfully in most parts of the United States. Plums thrive best on heavy soil with clay mixed, that abounds in the Central West. In such soil plum trees are, with reasonable care, entirely free from disease and are very productive. They are a splendid tree for the orchard or the poultry yard. The market for plums as for all good fruits, is constantly growing. There is rarely a glut in the market for the best of anything.

The care of plums is better understood than formerly. Plums can be easily protected against the attacks of the Curculio larval; purple with blue bloom; very productive; and will not deserve success. For the Curculio, treat as follows: Immediately after the tree has done blossoming, and the fruit is in the first stages of growth, make the ground clean and smooth under each tree and spread a sheet upon it so that it will extend as far as the outside edge of the outer branches, and then suddenly jar the tree, so as to shake down all the stung fruit and insects, which should be destroyed. If this operation be carried on daily for a short time it will insure a full crop of this delicious fruit, and will well repay the little daily attention given it. It is very important that this should be done early in the morning. The cost of protecting large orchards from the attacks of this enemy will not exceed ten cents per tree for the entire season.

The fungous disease, known as the Black Knot, must be properly cut and burned on its appearance.

BUDDED PLUMS.

NATIVE VARIETIES.

De Soto—A hardy variety; very productive; a profitable plum; originated in Wisconsin.

Forest Garden—Fruit large in size; yellow color; mottled; juicy and sweet; hardy and vigorous. July.

Hawkeye—Fruit large in size; bright color; mottled; red; fine quality; firm; carries well to market; tree hardy and heavy bearing. September.

Klondike—A new variety, exceedingly hardy, very productive and is here to stay. Fruit of good size and of excellent quality. Every planter should plant a few of this wonder in plums. 3 to 4 feet, 8c, or 3 for $1.00; 4 to 5 feet, 5c each, or 3 for $1.35.

Marianna—Fruit smaller than Wild Goose; nearly round; bright cardinal red when ripe; skin rather thick, small stone. Early August.

Wyan—One of the most popular native sorts. Very vigorous and productive. Large, purplish red; good quality. Tree a bushy grower. Ripens end of August.

Weaver—Fruit large, purple with blue bloom; very productive; is a regular bearer of plums of good quality; trees very hardy. August.

Wild Goose—Fruit medium size; red with blue bloom; flesh juicy and sweet. July.

Wolf—Vigorous, strong grower; hardy; is becoming popular; perfect freestone, large size and very prolific. August.

Maquoketa—A new plum, round, dark red, slightly marbled; size medium. One of the choicest for eating. Plums hang single on tree; not affected by rot, and have few punctures by the curculio; immense bearer. Season September.

FOREIGN VARIETIES.

Bradshaw—Large size; red skin; flesh green, juicy, productive. Fine variety for market. August.

Shipper's Pride—Large, dark purple, very showy, often measuring two inches in diameter; fine, juicy and sweet. September.

Damson—Small, oval fruit; skin purple, covered with blue bloom; flesh melting and juicy, rather tart; separates partly from stone. September.

German Prune—Medium size; oval; purple or blue; juicy, rich fine quality; tree fairly vigorous, very prolific; fine variety. September.

Gueli—Large, bluish purple, flesh yellowish green, rather coarse, sweet, pleasant. One of the best market varieties. September.

Lombard—The favorite market variety; medium size; violet red skin; juicy; good quality; hardy and prolific. August.

JAPAN VARIETIES.

Abundance—(Botan)—An old well-known and popular Japanese variety; hardy and productive; large fruit; lemon yellow in color with heavy bloom; good quality. August.

Woodland, Cal.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—The trees arrived all O. K. and am agreeably surprised to see such nice catalpas. Many thanks for the valuable presents and seed. I have had dealings with at least six other nurseries this season and you have treated me the best of all. Yours very truly,

WM. GOULD.

Haddock, Wis.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I will write a few lines to tell you that I have bought a large number of trees from your nursery and that every one is growing and we are very much pleased with them. Our premiums were nice, sound stock, also our $10.00 order came without charges, like the catalogue states. Yours truly,

EDWARD NEMETZ.

Lancaster, Cal.

The Galbraith Nursery Co., Fairbury, Neb.

Dear Co.—The trees were received and everything is O. K. Thank you very much for sending me such nice trees. Yours very truly,

JOSEPH REIH.

Dalhart, Texas.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—Our fruit trees and berry bushes arrived in good shape, and they are a fine looking lot of trees and bushes. Many thanks for the premium. Yours very truly,

F. W. BUNKER.

North Yakima, Wash.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I received my trees today in splendid condition. I am well satisfied. Yours very truly,

LEWIS MIERS.
**Burbank**—The best and most profitable Japanese variety for market. Ripens ten to fourteen days after Abundance; hardy; tree, sprawling; vigorous grower; unequalled in productiveness; bears young; fruit large and of excellent quality; cherry red with lilac bloom. August.

**Red June**—Recommended by such authority as Prof. L. H. Bailey as by all odds the best Japanese plum. Ripens before Abundance; one of the vigorous upright growers; productive; fair size; vermilion red with handsomely bloom; pleasant quality; ripens a week before Abundance. August.

**Satsuna**—Claimed to be the largest and most prolific of the Japanese varieties; fruit purplish red and very large. August.

**Wickson**—Sturdy, upright grower; productive almost to a fault; extremely handsome fruit; deep maroon red skin covered with white bloom; flesh fine in texture; sugary, delicious; a splendid keeper and shipper.

---

**Nectarines**

The Nectarines is almost identical with the Peach. The principal difference between the two is in the skin. The Nectarine has a smooth skin, while the Peach skin is downy. The fruit is smaller, but has a delicious quality. Their wax-like appearance makes them popular both for the table and market.

**Boston**—Fruit large, deep yellow, mottlings of red. Ripens in September.

**Downton**—Large, pale greenish yellow, with purple red cheeks. Ripens in August.

Prices of 3 to 4 ft. trees, each 25c; 10 for $1.80.

---

**Apricots**

Introduced into the West by the Mennonites. Extremely hardy, more so than the usual European varieties. In 1899, after the record-breaking low temperature of the previous winter, the Alexander and J. L. Budd bore fair crops. Usually are productive bearers and profitable.

**RUSSIAN VARIETIES.**

Russian Apricots are early, ripening in June and the early days of July. The varieties we have and recommend are Alexis, Alexander, Gibb, J. L. Budd, Nicholas and Harris.

**AMERICAN VARIETIES.**

**Superb**—One of the largest; orange with red cheek; firm, juicy with rich flavor; very productive. August.

**Royal**—Large; yellow with an orange cheek; juicy, rich and delicious; a fine variety. Last of July.

**Moor Park**—An English variety, the standard of excellence; very large, often measuring 2½ inches in diameter; almost round. Has the fault of ripening unevenly. Deep yellow in the shade, but brownish red if exposed to the sun; flesh firm, bright orange; parts easily from the stone. Juicy; fine flavor. Does not bear well in all sections. Ripens middle July.

**PRICES APRICOTS.**

Seedling Russian Apricots—From the very choicest fruit. They are very hardy and are sure to be profitable to you. The flavor is excellent. Each, 5c; per 12, 40c; per 100, $3.00.

---

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I received my trees all O. K. and I am well pleased with them and I could not get such trees elsewhere for double the money. Yours very truly,

A. H. ROLLYSON.

**Trinidad, Okla.**

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—I am in receipt of my order of trees, all in good shape. Everything in fine condition, for which accept my thanks, also thanks for the "extras" you put in. Whenever I am in need of anything else in your line you will certainly fill the order, as I am well pleased with this one. Resp't.

J. MADISON HALL.

---

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—We received the peach trees in fine shape. They are fine trees. We got some of the same size last year and they are in full bloom. We always get the best results from your stock. Yours very truly,

G. H. HIGHT.
Grapes

Every kind of good fruit has its uses in adding to but it would not be wrong to say that with the possible at all, grapes have the first place. They are delightful more wholesome. There are a few people who eat them dislikes from the grape seeds. Appendicitis from this cause county. We do not say that grape seeds may not produce has operated on a great many cases of appendicitis, said and had never known of a case well authenticated.

Grapes may be grown over the greater part of the grown almost anywhere. There is scarcely a yard in the vines cannot be planted. They are not choice about the place they shall grow, as they will grow up the side of a and will ornament the place and give profit and pleasure. inches deep. Plant about six feet apart. For a vine—in rows. Like all our products, our grapes are of the best and selected with great care.

Agawam—A good mid-season variety. Berry large; red; good sized clusters; quality excellent, with a decided aromatic flavor peculiar to the variety. Vine strong grower; productive; good foliage. Each, 8c; 10 for 75c; 50c for $5.00.

Brighton—This variety deserves to be better known. We cannot praise it too highly. It resembles the Catawba in color, form and size of cluster and berry, but ripens earlier, with the Delaware. It unites the good qualities of the two varieties, the sprightliness of the Catawba with the sweetness and richness of the Delaware. Vine a good, vigorous grower and productive. Each, 8c; 10 for 75c; 100 for $5.00.

Campbell's Early—This variety has earned for itself a place among the best standard grapes. Early maturing; productive; vine strong, hardy, vigorous; thick, heavy, healthy foliage; ripens middle to last of August. with Moore's Early; remarkably fine keeper. The fruit is large; of glossy black color, with beautiful blue bloom; pulp sweet; juicy; seeds small and part readily from the pulp. A good variety for those who do not like to swallow grape seeds; clusters large and handsome. Each, 15c; 10 for $1.40; 100 for $12.00.

Catawba—Very large grape; valuable for this reason; requires long season for full maturity. Berries large, round; when ripe have a dark copper color; flavor sweet, rich, musky. Each 10c; 10 for 80c; 100 for $6.00.

Champion—The earliest of all varieties; full of charac-

Diamond
ter and quality; succeeds in all sections, where grapes grow; a valuable market grape. Berry large size; of medium quality; a strong free grower, and very hardy. Each, 10c; 10 for 75c; 100 for $6.00.

Concord—The best known of all grapes; deserves all the good things that are said about it. A large purple-black grape; ripens middle to last of September; vines remarkably vigorous and free from disease; most popular market variety. Each, 10—100 1000
Concord, 2 year, select................. $ .35 $ .50 $4.00 $22
Concord, 1 year, very heavy............... .05 .40 3.00 22
Concord, 1 year, splendid................ .04 .50 2.00 17
Diamote—The leading early white grape, ripening before Moore’s early; white, with rich yellow tinge; juicy, few seeds; almost free from pulp; excellent quality; about medium size; adheres to stem; vine similar to Concord in growth, hardiness and foliage; fine variety for both market and home garden. Each, 10c; 10 for 90c; 100 for $5.00.

Elivra—Berry white in color; cluster compact; vine vigorous grower; hardy and prolific; ripens a week later than Concord; splendid for wine. Each, 8c; 10 for 50c; 100 for $4.50.

McFike—This is really a wonderful grape. It has not been tested in all climates, but it is a marvel in this great region of the Mississippi Valley. It has wonderful size, the berries measuring nearly three inches in circumference, and being remarkably uniform in size on the cluster; clusters compact and beautiful; the berry has a delicious flavor, resembling the Worden, its parent, but fully twice as large. It ripens about a week or ten days before the Concord. Every one who has room for only a few vines should try this wonderful grape. Price, 20c each; 10 for $1.75, two years, strong vines.

Niagara—A favorite grape of the light color varieties; cluster medium to large in size, compact, occasionally shouldered; berry large, roundish, uniform; skin thin, but tough; pale green at first, changing to pale yellow when fully ripe, with thin, whitish bloom; flesh slightly pulpy, tender, sweet; vine exceedingly hardy and vigorous, very productive; foliage thick and leathery; ripens with Concord. Each, 8c; 10 for 60c; 100 for $5.00.

Pocklington—A valuable white grape. Pale green color, sometimes with tinge of yellow where exposed to sun; clusters large; hard, very compact; berries very large, with beautiful white bloom; flesh juicy and sweet; foliage vigorous, large, leathery; vine moderately good grower, very healthy and hardy; vines bear abundant crops of fine, healthy, showy clusters. Each, 10c; 10 for 70c; 100 for $5.50.

Woodruff—Has remarkable hardiness. A rank, rapid, healthy grower; fruit large in bunch and berry; attractive; shouldered, sweet and of medium quality; very desirable as a market variety; ripens soon after Concord. Occupies the same position among red grapes as Concord among the black ones. Each, 10c; 10 for 80c; 100 for $5.00.

Moore’s Early—An early variety, very popular in Canada and northern portions of the United States, where it grows with uniformly good results. Each, 10c; 10 for 70c; 100 for $5.00.

Worden—Much like Concord, superior in some respects; earlier; vine harder than Concord, and superior in quality; berry and cluster large in size; popular sort, planted largely for market, next to Concord in number. Each, 7c; 10 for 60c; 100 for $4.50.

Wyoming—Vine very hardy and robust, with thick leathery foliage; berry much larger than Delaware, which it resembled; in color brighter than Delaware, when ripe being a beautiful amber of red; one of the most beautiful red grapes; flesh juicy, tender; sweet, with strong, native aroma. The best early market variety; ripens before Delaware. Each, 10c; 10 for 80c; 100 for $4.00.
Currants

Currants are among the best of the berries. With reasonable care most varieties are hardy and prolific. Their worst enemies are worms, but these can be destroyed with comparatively little trouble. For this purpose use Paris Green, one ounce in twelve gallons of water, as soon as the worms appear. For the second brood use powdered hellebore. It will pay anyone, with any yard at all, to raise currants; nothing is so good for jelly, and for other purposes, they are relished by most people and very wholesome. Our plants are large and well rooted. One-dollar lots go by mail at price of single bushes.

VARIETIES.

Cherry—Very large sized berries, being sometimes half an inch in diameter; the bunches are short; the plant is vigorous and productive when grown on good soil and well cultivated. Each, 7c; 10 for 60c; 100 for $5.00.

Crandall—A native black seeding of the Western wild currant, and considered by many to be superior to any of the named varieties yet produced. Distinct from the European black varieties and without their strong odor. Exceedingly productive; strong, vigorous grower, usually producing a crop the next year after planting. The berry is of large size, being half to three-quarters of an inch in diameter; easily picked; can be shipped farther and kept longer than any other small fruit. Free from all attacks of insect enemies. Each, 10c; 10 for 80c; 100 for $6.00.

Fay’s Prolific—A valuable currant for the East, where we sell them to customers; they are not adapted to the West; in the East they rank as the best red currant; very large and enormously productive. Each, 8c; 10 for 70c; 100 for $5.00.

North Star—We claim for this currant that it is the best red currant grown. It is extremely hardy and very prolific; a strong, hardy grower; the berries do not split and drop off; crops are very sure; the berry is firm, of good size and sweet. If you want only the one variety, try the North Star. Each, 8c; 10 for 70c; 100 for $5.00.

Dutch—An old favorite variety; berry of good quality, medium size; bunches long; very productive. Each, 7c; 10 for 60c; 100 for $5.00.

Victoria—Berries are large in size, bright red in color; bunches very long; the vine is a strong, upright grower and very productive; ripens late; a valuable market variety. Each, 7c; 10 for 60c; 100 for $5.00.

Perl—Very large size; yellowish, white, sweet, of very mild and excellent quality and valuable for the table, the finest of the white sort; very productive. Each, 7c; 10 for 60c; 100 for $5.00.

Perfection—This currant is bound to become a great favorite on account of its size, flavor and bearing qualities. The bush is much more woody and upright than other red varieties. The fruit is in long and thick clusters. It is surpassing all other varieties in the East, and does well in the West. It has taken more medals and prizes than any currant on the market. Each, 25c; 10 for $1.50; 100 for $12.50.

Gooseberries

The Gooseberry is a valuable berry and is growing more popular every year. For cooking, whether green or ripe, it has great value. It requires the same cultivation and treatment for worms as the Currant.

The American varieties, though not quite so large as the English sorts, are of fine quality and are not subject to mildew. To prevent mildew, use one-half ounce potassium sulphide to one gallon of water.

VARIETIES.

Any Variety Postpaid, 25c each.

Downing—The berry is of large size, handsome pale green, and of excellent quality for cooking and table use; the bush is a vigorous grower and free from mildew; one of the best for home use and for the market, hardy and productive, 2 years, each 14c, 10 for $1.50; 100 for $11.00.

Houghton—An American variety of medium size; popular, hardy and never mildew; bush bears abundant crops regularly; berry smooth, red, tender, fine quality; a hardy, valuable variety, 2 years, each 11c; 10 for $1.00; 100 for $9.00.

Buffalo Berries

A tree-like shrub of compact growth, well worth culti-

vating for ornamental purposes alone. Per pair, 25c; 10 pair for $2.00.

Elderberries

Plants, two feet, each, 10c; 10 for 90c.

Juneberries

Improved Dwarf Juneberry—A valuable berry; good substitute for the large swamp huckleberry or whortle-

berry, which it resembles closely in appearance and quali-

ity. The bush is extremely hardy, enduring the cold of the far North and the heat of the summer without injury. In habit it is similar to the currant, the bushes attaining the same size; the fruit is borne in clusters, reddish purple in color, changing to a bluish black; in flavor it is mild, rich, sub-acid; excellent as dessert fruit or canned. The blossom is large and composed of fine white petals. These beautiful blossoms contrasted with the rich, glossy green of the foliage, makes this variety a very handsome ornamental shrub. Prices: Bearing size, 10 to 18 inches, each, 10c; 10 for 90c; 100 for $7.00.
The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—The trees and seeds came all right. I will try and get another lot soon. Kindly send more order blanks. Yours very truly,

T. C. Holmes.

THE GALBRAITH NURSERY CO. FAIRBURY, NEBRASKA

Strawberries

Please do not order fewer than 25 of one variety, as we do not break bunches. Plants marked perfect need no fertilizing. Those marked imperfect need a plant marked perfect to fertilize them.

BE CAREFUL HOW YOU PLANT STRAWBERRIES.

VARIETIES.

Bedwood—By some considered the best early berry; immensely large, healthy grower; plant hardy; fruit large, bright red, fine quality. For near market and home use this is a very satisfactory and profitable variety. A valuable fertilizer, especially for Warfield. Perfect.

Bubach—An old reliable variety that has been under cultivation for many years. Fruit large and handsome, roundish-conical, bright scarlet, moderately firm and of fair quality. Plant a strong grower, with large, healthy foliage and very productive. Succeeds on either light or heavy soil. Desirable for home use and nearby market. Season early to medium. Imperfect.

Crescent—Perhaps the most popular of all. Plants strong, hardy and very productive; fruit extremely large, dark red, fine flavor. A splendid market variety. Imperfect.

Gandy—A good late variety; berries light red and of even form and size, large and firm; plants are healthy and vigorous grower. Perfect.

Warfield—One of the best varieties, if not the best. Rivals already by popular favor and in general qualities the Crescent, which it is likely to supersede. It equals Crescent in yield and surpasses it in size, beauty and firmness. The plant is a vigorous grower of bright, healthy foliage. The fruit is large, dark red; excellent for shipping. Bedwood is a fine fertilizer for this plant. Perfect.

Senator Dunlap—A well-tested, wonderfully productive variety, one of the safe sorts to plant everywhere and sure to take a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants, fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality; one of the best for canning; ripens early and continues a long time. It promises to stand at the head in the wonderful ability to ripen a good crop under almost any condition of drouth or neglect. Perfect.

"Have tried a number of varieties of strawberries, but have found none that yields like the Dunlap. The 'New York' is an enormous berry and of fine flavor. Brandywine yields well, but is not liked by customers on account of the large core that pulls out when the berries are capped; a little rain spoils this variety on the vine, too. The Cilmex is a good berry for size and firmness, but is a little too acid for me."—Fruit-Grower.

Wilson's Albany—One of the best fertilizing plants known. Fruit heavy; berries perfect; good shipper; plants bright and clean; no rust. Perfect.

Prices of Strawberries.

\[ \begin{array}{ccc}
25 & 100 & 1000 \\
Crescent, Wilson, Warfield and Bedwood. & $2.20 & $5.50 \\
Dunlap, Gandy and Bubach. & .30 & .50 \\
\end{array} \]

By mail, any variety, postpaid, 25 for 25 cents; 100 for $1.00. We will not guarantee or replace strawberry plants that go by freight.

Blackberries

Blackberries are among the best known and most unfortunate as not to like them. No fruit of any kind is children, and are used, of course, in medical practice. A doctor's bills, and they are also economical on other grounds.

Blackberries should be planted in rows six to seven feet apart, four to four feet in the row. Keep the feet they have reached four feet in height. All our blackberry plants are grown from selected rooted.

VARIETIES.

Early Harvest—One of the earliest blackberries in cultivation; very fine in quality; enormous bearer, as are all the blackberries listed here; not so hardy as the Snyder, requiring protection in the North. Each, 5c; 12 for 25c; 100 for $1.75.

Snyder—Perhaps the most popular of the blackberry family; combines many good characteristics; enormously productive and so hardy that they can withstand the winters of the North and Northwest better than any other variety yet produced. It is a very early variety. Canes strong, thifty, heavy. The leading variety in northern latitudes. Each, 5c; 12 for 25c; 100 for $1.75.

Stone's Hardy—This is a very superior blackberry; the kind you can depend upon; very hardy and extremely prolific; berry fine in quality, sweet and rich. Each, 5c; 12 for 25c; 100 for $1.75.

Iceberg—Raised by Luther Burbank, the "Wizard of Horticulture," who gives the following description of white blackberry, Iceberg. "One of the great-grandparents of Iceberg was Lawton. The first generation of seedlings, when crossed with Crystal White, were all black, the second, also, though varying much in other respects; but the third produced this wonderful plant, bearing the snowiest white berries ever seen. Very little attention was paid to the long rows of crossbred descendants, until one day this berry was discovered among its black relatives, with the canes bending in various directions with their load of delicious, snowy berries, which are so transparent that the unusually small seeds may be seen in the berries when ripe. Cluster larger than Lawton; berries were at least as large, earlier, sweeter, more tender and melting throughout, though firm as Lawton when ripe." Each, 15c; 12 for $1.25; 100 for $6.00.

Raibun—Vigorous, branching, making plenty of fruit-wood. Has stood safely 20 degrees below zero and bore a full crop the next summer. Roots sucker very little and must be propagated by layering the tips of the shoots. Produces more fruit than any variety we know of. Each, 5c; 12 for 50c; 100 for $3.00.

Manchester, Kans.

Gentlemen:—The trees and seeds came all right. I will try and get another lot soon. Kindly send more order blanks. Yours very truly,

T. C. Holmes.

Delphos, N. M.

The Galbraith Nursery Co., Fairbury, Neb.

Gentlemen:—Order No. 1724 was received today and trees were in good condition upon their arrival. I am well pleased with my trees. Yours truly,

Howeth Allen.
Raspberries

Raspberries do well North or South, East or West, and will flourish on any soil that will produce a corn crop. The land should be carefully and thoroughly prepared and well enriched. Ground bone is one of the best fertilizers for raspberries. Be sure the canes have good cultivation, keeping clear of weeds and suckers. Keep the soil light. As soon as they have done bearing, cut out the old wood and give more vigor to the young canes.

Columbian—An improvement on Shafter's, which it resembles, but the berry is firmer, adheres to the bush much longer, and retains its shape better, both on the market and for canning. Bush a strong grower, attaining a very large size. One of the hardiest and wonderfully prolific. Unexcelled for productiveness, and stands at the head for canning, making jam, jell, etc. Each, 5c; 10 for 50c; 100 for $1.00.

Cuthbert—A favorite variety, both North and South, standing extreme hot and cold weather equally well; the berry is large, crimson in color; flavor sweet, luscious. Each, 5c; 10 for 50c; 100 for $2.00.

New Cardinal—This wonderful berry is a surprise in the fullness of its merits—its great growth, extreme hardiness, and the exceeding productiveness of its choice, red, rich, pure flavored berries. It is not a novelty, but a variety of great merit. The New Cardinal is claimed to grow ten feet high, and bears in proportion. Leading horticulturists who have seen this berry say that it is one of the wonders of the garden so far exceeding all others as to put it entirely beyond comparison. Judge Wellhouse, president of Kansas State Horticultural Society, said at the meeting of the society that the introduction of the Cardinal Raspberry would add millions to the wealth of the farmers of the country because of its inherent great vigor and exceeding productiveness. Each, 10c; 10 for 75c; 100 for $6.00.

Golden Queen (Yellow)—A great favorite for the home table. We know of no more attractive dishes than those offered by this beautiful berry. The color is a beautiful, translucent amber color and exceptionally firm. Its productiveness is extraordinary. Ripens in mid-season. No home garden is complete without it. Each, 6c; 10 for 50c; 100 for $4.00.

Hansell—Red; large; good quality and hardy. Each 5c; 10 for 25c; 100 for $1.50.

London—Best red berry. Its points of superiority are vigor of growth, large fruit, rich, dark crimson color, good quality and marvelous productiveness, hardiness, during winters without protection and without injury. Each, 8c; 10 for 50c; 100 for $4.00. "For a fancy red raspberry I recommend the London. The longer I raise it, the higher is my opinion of it. It is a most beautiful berry of the largest size and almost translucent. It is the heaviest bearer of any variety I have tried."—Frut groower.

Turner—Fine market variety; valuable on account of its early ripening and fine quality; medium size and color; very hardy fruits, standing unwintered where many varieties have been winter-killed. Each, 5c; 10 for 25c; 100 for $2.50.

Black Raspberries

Must be planted very shallow, not over ¼ inches deep.

Varieties.

Cumberland—"The Business Blackcap." It is of wonderful productivity, producing regularly very large crops. In size the fruit is simply enormous, surpassing any other variety. The berries run seven-eighths of an inch in diameter. In quality it is similar to the Gregg. Although extremely large, it is unusually firm and is well adapted for long shipments. In ripening it follows Palmer and precedes Gregg a short time, making it a mid-season variety. It is an unusually strong grower, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit. Each, 6c; 10 for 50c; 100 for $4.00.

Gregg—This variety is the leading late blackcap; the canes are strong, vigorous growers and very productive; berries very large and of good quality. Each, 5c; 10 for 25c; 100 for $1.75.

Kansas—This splendid variety nearly equals the Shafter in growth of cane and in productiveness. The fruit is larger than the Gregg, and it is the hardest blackcap known. It is unquestionably the best general crop, all-around black raspberry now offered. Each 5c; 10 for 25c; 100 for $2.00.

Palmer—One of the best of the early blackcaps. The vine is a strong grower, very hardy and productive, the canes often bending to the ground under the weight of fruit. The berry is of fine quality, ripening at same time as Sovereign. Each 5c; 10 for 25c; 100 for $2.00.

Souhegan or Tyler—One of the earliest of the black raspberries. The entire crop ripens very early and very evenly. The canes are vigorous, strong and hardy; foliage is free from rust, and this variety is remarkably productive; the fruit is of good size, jet black, firm and sweet. Each, 5c; 10 for 25c; 100 for $1.50.

Dewberries

Postpaid, Each 10c.

The Dewberry is a fine, large berry of fine quality. It does well on almost any soil, thriving splendidly on stony ground. Both varieties listed here are excellent, and deserve a trial, if you are not familiar with the merits of the Dewberry. Plant shallow, not over two inches deep.

Varieties.

Lucretia—A fine berry; vine thrifty and hardy; trailing and extremely productive, with large showy blossoms; very valuable for home use. This fruit ripens early, is often one and one-half inches in diameter, soft and luscious, melting, with no hard core. Each, 8c; 10 for 25c; 100 for $2.00.

Mammoth Dewberry—This is a popular variety. A favorite berry on rough, stony ground. Each, 5c; 10 for 25c; 100 for $2.00.

Austin Dewberry—Originated near Pilot Point, Texas, and has been thoroughly tested. Blooms late and bears regularly. Ripens just after strawberries. Each, 5c; 10 for 40c; 100 for $2.00.

The Logan Berry

A hybrid between the Raspberry and Blackberry. The fruit is large as the largest Blackberry, and is produced in immense clusters. The color is clear, dark red. It partakes of the flavor of both the Blackberry and the Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm, and of exceptional size. Strong grower; enormous bearer. Fruit ripens early, just after Strawberries. Each, 15c; 10 for $1.50.

Japanese Wineberry

A new and distinct valuable berry. It belongs to the Raspberry family. The fruit is borne in large clusters, often 100 berries in a bunch. The berry is enclosed in a burr, which opens when the fruit is ripe. Flavor distinct from any other berry, luscious and good. Ripens in July and August. One of the most prolific berries ever known for wine. Each 10c; 12 for $1.00.

Horse Radish

10 for 20c; 100 for $1.50. By mail, 18 for $1.00.
Asparagus Roots

One of the first vegetables in the spring. A bed of asparagus planted in the right way will yield well for twenty years. Set crown of root about four inches below the surface.

Columbian Mammoth White—This variety is of excellent quality; produces shoots that are very white in color, and will remain so as long as they are fit for use.

Conover's Colossal—A mammoth variety of vigorous growth, sending up from 18 to 20 sprouts each year, one inch in diameter. The color is a deep green, and the crown very close.

Palmetto—A very early variety of asparagus of even, regular size and of fine quality. Any sort, 10 for 10c; 100 for 50c; 1,000 for $4.00.

Rhubarb or Pie Plant.

Rhubarb is a valuable, wholesome, early product of the garden. It will grow under almost any condition, but does its best with good care and in very rich soil. It comes earlier than anything in the season for tarts and pies, continues for a long time, and is excellent for canning, as well as for immediate use.

Varieties.

Linnaeus—This is a large variety, fine quality, early, and leaves a fine, even product in cooking. Each 5c, 12 for 50c; 100 for $3.00.

Victoria—A strong, vigorous grower; produces stalks of extra large size and of splendid quality; color is a delicate pink. Each, 6c; 10 for 35c; 100 for $3.00.

By mail, postage paid, 12 for $1.00.

Privet Colored Plate sent on request.

BARBERIS THUNBERGII (Hedge).

A dense low-growing species from Japan. In Autumn, after the leaves fall, the branches are seen loaded with scarlet berries. The most beautiful of all the hedges. (Colored plate sent on request.) Per 10, 60c; per 100, $5.00.

NORWAY POLAR OR SUDDEN SAWLOG.

A late introduction of exceptional merit. It receives its name from its remarkably rapid growth. It is very similar to the Carolina Poplar, but it is a much faster grower, attains a greater height and forms a heavier limb. Four foot trees, each 15 cents.

Russian Mulberry

**Budded Mulberries**

Downing's Everbearing—The berries are very large, black, handsome, sweet, rich, excellent in every way. 4 to 5 feet, each, 25c; 10 for $2.50.

New American—Equal to Downing's in all respects, and a much harder tree; vigorous grower; very productive; the best variety for fruit; ripe from the middle of June to the middle of September. 4 to 5 feet; each, 25c; 10 for $2.50.

**Catalpa Speciosa**

The demand for the Catalpa Speciosa has almost swamped the growers. We find that it is impossible to grow enough to meet the eastern wholesale demand, but we always keep enough for our catalogue trade.

The value of the Speciosa wood has become very well known in the last few years. Extensive experiments by the government, individuals and railroad companies have proven conclusively that it has an enormous value. The average value today of a Catalpa Speciosa plantation is from $600.00 to $800.00 per acre. It will be worth infinitely more in fifteen or twenty years from now. All interested in this subject should get the full report made by the United States Government, Department of Agriculture.

Deciduous Ornamental Weeping Trees

Kilmarnock Weeping Willow—This is a top-grafted tree and forms a very shapely head with glossy foliage, but it is not entirely hardy for the northwest, and would advise planting other varieties. Each, 75c.

Birch (Cut-Leaved Weeping)—This we consider the most graceful and beautiful tree on the list of ornamental trees. It is perfectly hardy, grows tall and slender, with small, graceful, willowy branches. The trunk of the tree as it comes from the nursery is brown, but in two or three years it becomes a pure white, giving it a very attractive appearance. 5 to 6 feet. Each, $1.00

Tea’s Weeping Mulberry—This tree stands at the head of all the top-grafted weeping trees for beauty. It forms an umbrella shape and the long slender willowy branches sway to the wind. It will stand through all seasons and continue to be a most beautiful tree for the lawn or cemetery. 5 to 6 feet. Each, $1.00.

Wisconsin Willow—This tree is more cheaply grown than the other described weeping trees, but when care is given in the heading back after being planted out, it can be very easily trained to be a very beautiful tree. It is perfectly hardy. 5 to 6 feet. 25c each.

Camperdown Weeping Elm—Its vigorous branches, which have a uniform habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large, glossy dark green. A strong vigorous grower. One of the best weeping trees. Hardy. $1.00 each.

Weeping Mountain Ash—A beautiful tree with straggling, weeping branches, making a fine tree for the lawn, suitable for covering arbors. Foliage and berries like the Mountain Ash. Hardy. $1.00 each.

Deciduous Upright Ornamental Trees

DECIDUOUS UPRIGHT ORNAMENTAL TREES.
We grow many varieties of ornamental and shade trees that are not listed on account of lack of space.
The varieties priced below are all standard trees, and will give you satisfaction. If you want something larger in price than those listed below, write for our price, purchaser paying the freight.
Trees do not give pleasure merely; they may be reckoned as one of the absolute necessities to an advanced civilization. The absence of all trees would mean ruin to our country. It is an encouraging sign that there is such a growing interest in tree cultivation. He who sets out a good tree is a public benefactor, and no good tree should be cut down without some good cause. Trees will in the future, more than now, add very greatly to the money value of a farm or town lot.

Camperdown Weeping Elm.
**DECIDUOUS UPRIGHT TREES—Continued**

**Carolina Poplar**—Perhaps the most rapid of growers; succeeds everywhere; is especially adapted to large cities, where it makes an unusually rapid growth and resists gas and smoke. For new places and streets, where slower growers are desired, plant the poplars between, and you will secure an almost immediate effect. When the other trees attain the same size the poplars can be removed. The leaves are large, handsome, deep green. The tree has a pyramidal form, making a spreading head and dense shade when properly trimmed.

</tr>
<tr>
<td>8 to 10 ft</td>
<td>$5.00 $40.00</td>
</tr>
</tbody>
</table>

Catalpa Bungei or Umbrella Tree—Grafted on stumps 6 to 8 ft high, it makes an umbrella-shaped top without pruning. Particularly hardy. Flourishes in almost all soils and climates. Leaves are heart-shaped, deep green, lay like shingles on a roof; always make a symmetrical head. $1.25 each. (Color plate free on request.)

Catalpa Speciosa—The hardest variety in the west, where it originated; a rapid grower, does not do so well in extreme north; very desirable for shade; flowers grow in large clusters; very large leaf. Each 4 to 5 feet, 15c; 5 to 6 feet, 20c; 6 to 8 feet, 25c.

*Elm (American White)*—Unsurpassed shade tree for park or street; always a favorite. It attains to large size and is very beautiful and imposing, with its wide spreading head and graceful, drooping branches.

<td>$2.25 $22.00</td>
</tr>
<tr>
<td>8 to 10 ft</td>
<td>$5.00 $40.00</td>
</tr>
</tbody>
</table>

*Hard Maple*—Much harder than the Soft Maple, but not so easy to start, but with persistence and care, they can be made to grow in almost any climate. Form a much more perfect head than the Soft Maple, and stand drought and heavy winds much better. Beautiful shiny green leaves. One of the very best for lawn or street decoration. Price, each 5 to 6 feet, 25c.

**Varieties.**

**Ash (American Native)**—A rapid growing native tree of fine symmetrical outline; a valuable park or street tree; should be extensively planted for timber, as it is extensively used in the manufacture of agricultural implements, railway cars, furniture, etc.

DECIDUOUS UPRIGHT TREES—Continued

Honey Locust—A rapid growing tree, delicate foliage of a beautiful, fresh, lively green, and with strong thorns; makes a handsome shade tree, and is impenetrable as a hedge. 3 to 5 feet, each, 8c; 10 to 75c. 5 to 7 feet, each, 15c; 10 for $1.50. 8 to 10 feet, each, 20c. 15 to 20 ft. each, 40c. 20 to 25 ft. each, 75c. 25 ft. and over, 5.00.

Horse Chestnut (White Flowering)—This is a popular European species; very handsome; has magnificent spikes of white flowers; as a lawn tree or for the street it has no superior. 5 to 6 feet, each, 75c.

Judas Tree (Red Bud)—A small growing tree of regular form with heart-shaped leaves. It is covered with delicate pink blossoms early in the spring before the leaves appear. A fine ornamental tree worthy of general planting. Each 5 to 6 feet, 30c.

Linden, American (Basswood)—A rapid growing, beautiful tree, with very large leaves an fragrant flowers. 5 to 6 feet, each, 40c; 10 for $2.50. 6 to 8 feet, each, 50c; 10 for $4.50.

Mountain Ash (European)—Fine, hardy, handsome tree; head dense and regular; covered from July till winter with great clusters of bright red berries. Each, 5 to 6 feet, 50c.

Poplar Balsam (Balm of Gilead)—A remarkably rapid growing tree, with luxuriant, glossy foliage. Each 5 to 6 feet, 25c.

Purple Leaf Plum—Prunus Pissardie—In spring this little tree contrasts masses of rose pink flowers with its pink purple leaves. Later it is thickly hung with wine-red fruit. The purple leaves and bark make it extremely handsome and showy throughout the entire season. Perfectly hardy. 2 to 3 feet. Each 25c.

Russian Olive—Tree attains a height of from 20 to 30 feet; dark green; wood very heavy and burns like a candle (called by some of the Europeans candle tree); foliage rich silver color, willow shape; flowers deep gold and very fragrant; hardy. It is a beautiful ornamental plant and should be in every collection. Each, 4 to 5 feet, 30c; 10 for $2.50. Each, 5 to 6 feet, 50c; 10 for $3.00.

Russian Mulberry—Hardy; not used externally for ornamental purposes. Makes good windbreak tree. Fruit readily eaten by chickens, etc. Each, 3 to 4 feet, 8c; 10 for 50c. Each, 4 to 5 feet, 10c; 15 for 90c. Each 5 to 6 feet, 15c; 10 for $1.30.

Silver Poplar—A quick growing tree with spreading outline. Leaves are dark, glossy green above and silver white below. Easy to transplant and hardy everywhere. Has been found of great value in farm and prairie forestry. It is sometimes called Silver Maple. 4 to 5 feet, 15 cents each. 5 to 6 feet, 20 cents each.

Soft Maple (Silver Leaf)—Foliage is bright green above, silvery white beneath; a very rapid grower.

Elgin, Oregon.

Henry Martin.

The Galbraith Nursery Co., Fairbury, Nebr.

Gentlemen:—My order of fruit trees and blackberries arrived the 20th by express, all in good shape. Thanks for the premium. Yours very truly,

HENRY MARTIN.

Selbert, Colo., Star Route, April 2, 1909.

The Galbraith Nursery Co., Fairbury, Nebr.

Dear Sirs:—I received the first shipment of trees this evening and find them in excellent shape, strong and sound, the same size from the time they were shipped from your nursery. And I also hope that my second shipment may arrive in as good a condition. Thanking you for your prompt attention, I remain, yours truly,

SAMUEL LINCOLN.

The Galbraith Nursery Co., Fairbury, Nebr.

Gentlemen:—My trees arrived Saturday in good shape. Were well pleased with them. Will send another order soon. Yours very truly,

MRS. C. STUTZ.

Fargo, N.D.

GALBRAITH NURSERY CO., FAIRBURY, NEBRASKA

The Galbraith Nursery Co., Fairbury, Nebr.

Gentlemen:—Our trees all arrived safe and sound. Thanking you for the extra grape vines, am much pleased.

MRS. M. E. McMILLEN.

Dexter, Kans.

The Galbraith Nursery Co., Fairbury, Nebr.

Dear Sirs:—Your trees just arrived. Am pleased. Thanks for your promptness.

THOMAS VAUGHN.

Ault, Colo.

The Galbraith Nursery Co., Fairbury, Nebr.

Dear Sirs:—I received my order of trees O. K. and am much pleased with them. Yours truly,

GEO. GABLER.

Coldwater, Okla., March 6, 1909.

The Galbraith Nursery Co., Fairbury, Nebr.

Kind Sirs:—Our trees have come and are in fine shape. We thank you for your premium No. 5, also. Yours truly,

S. J. MESSENGER.
Bulbs for Spring Planting

MADEIRA VINE
An old-fashioned climber, familiar to all. Each, 5c; per 10, 30c.

DAHLIAS

The Dahlia is one of our most beautiful plants and is the most neglected. It is undoubtedly caused by the inferior grade of bulbs that have been scattered around the country. We have been raising Dahlias successfully for several years and this year we are able to introduce some wonderful new varieties, which we hope will take the place of the small common pompon. A glance at the illustrations will show what has been accomplished. The Dahlia is the easiest to care for of all summer bulbs. Plant them and keep the weeds away and the bulb will amply reward you for your trouble.

SHOW VARIETIES.

Pioneer—The nearest approach to a black Dahlia of any yet introduced. For combined excellence it has no superior. 3 feet high. Each, 25c; per 5, 65c.
Queen of Yellows—Fine clear yellow. 4 feet high. Each, 20c; per 3, 50c.
Snow—A beautiful pure white, long stem. Excellent for cutting. 4 feet high. Each, 25c; per 5, 65c.
A. L. Chase—Creamy white, streaked with purple; sometimes solid purple. 3 feet high. Each, 20c; per 2, 80c.
Bon Ton—A fine ball-shaped flower of a deep garnet

GLADIOLI (Named Varieties)

These handsome and stately flowers are deservedly popular. Of robust and erect habit, they have green, sword-shaped leaves and splendid flower-scarps rising from 2 to 3 feet in height. There are a variety of colors, as orange, scarlet and vermilion, upon yellow and orange grounds, with various shades from white and rosy blush and salmon-rose tints to a salmon-red and nankeen. A succession of bloom may be had from July to September, by planting at intervals from April to June, reserving the strong bulbs for the late plantings. Gladioli require very little attention and will grow in any ordinary garden soil. They should be lifted in the fall and placed in a dry cellar.

Price—Each, 10c; per 10, 60c; (state color desired).
Mixed Gladioli, each 5c; per 10, 25c.

CANNAS

These tall-growing, tropical foliage plants are most striking in their appearance and possess great beauty. They should be planted in the spring and taken up in the fall. We have a complete assortment of varieties, including all the late introductions.

Burbank Bronze—Green foliage. Each, 10c; 10 for 80c.
Pure Yellow—Green foliage. Each, 10c; 10 for 90c.
Deep Red—Red foliage. Each, 10c; 10 for 75c.

CALADIUM, or Elephant Ear
Large leaved decorative plant. Each, 10c; 3 for 25c.

TUBEROSE—MEXICAN

The perfection of all Tuberoses; the most waxy appearance and most fragrant. Each, 5c; 10 for 30c.

BLEEDING HEART
A familiar and popular flower; good strong bulbs. Each, 15c.
Each, berries with the also double green; for shrub high.

Flowering Calycanthus Barberry—fine double has rosy bloom in high. A spicy winter.

— Leave 4—Cactus. Creamy white, fine form. 3 feet high. Each, 30c; per 3, 75c.

Standard Bear—Cactus. Rich, fiery scarlet, one of the very best. 3 feet high. Each, 50c; per 3, 60c.

Kriemhilde—An exquisite delicate shell-pink, shading to white in the center; undoubtedly the finest and most perfect pink Cactus Dahlia to date, and as a cut flower is likely to supersede all the other pink sorts. Each, 25c; per 3, 50c.

PAEONIES

Paeonies—See outside back cover.

Ornamental Shrubs

Honeysuckle Tree—Flowers of delicate pink; a handsome, showy shrub. Each, 25c.

Althaea—See outside back cover.

Hydrangea Paniculata Grandiflora—One of the most valuable and handsome of ornamental shrubs. It attains a height of three to four feet, and is extremely hardy everywhere. Flowers white, borne in immense panicles nearly a foot in length. It commences flowering in August and continues until November. The plant should be cut back every spring at least one-half of the previous season’s growth, as the flowers are borne on the new wood, and are much finer and more abundant when treated in this way; excellent shrub for cemetery planting. Each, 20c; 10 for $1.00.

Japan Snowball—A rare and exceedingly beautiful species from Japan; flowers in large globular heads, pure white, hanging on the bush long; foliage is very handsome in the fall. Each, 40c.

Lilac—A fine shrub of tree like growth, with dark shining leaves; blooms in June and earlier; flowers are borne in great profusion, of a delicate shade and very fragrant; both purple and white. Each, 25c.

Purple Fringe—A small native tree with ash like leaves, and trusses of purple flowers, resembling an elegant fringe. Each, 25c.

Pyrus Japonica—Two to three feet; popular showy shrub; very hardy; forms a beautiful hedge; flower deep crimson; sometimes called Japan Quince. Each, 25c.

Red Flowering Currant—A beautiful shrub of easy culture, very ornamental foliage and flowers; fruit is showy and very attractive; valuable for grouping with other shrubs. Each, 20c.

Spiraea—Pink. Dwarf habit, but very early blooming, blooms all summer with showy pink flowers in masses. Each, 20c.

Spiraea—White (Van Hout!).—The grandest of all the Spiraeas; when in full bloom, is a complete fountain of white, foliage hardly showing; perfectly hardy and an early bloomer. Each, 10c; 10 for 80c.

Syringa or Mock Orange—Blooms early in June; flowers are pure white, fragrant and borne in dense clusters; one of the most desirable shrubs for planting on lawns for landscape effect. Each, 20c.

Tree Hydrangea—This is the same as the common hydrangea, only it is of a tree form, bringing the blossoms up in the air and giving it a surprising gracefulness and beauty. Each, 60c.
ORNAMENTAL SHRUBS—Continued

**Weigela, Rosa**—Beautiful shrub that blooms in June and July; flowers are produced in great profusion, almost hiding the foliage; very desirable for gardens or grouping. Each, 25c.

**White Fringe**—In favorable locations develops into tree-like proportions; the contrast between its large deep green leathery leaves and the loose drooping branches of white flowers which resemble silken fringe, is very beautiful; blossoms in May and June. Each, 25c.

**Yucca (Adam’s Needle)**—A conspicuous tropical-looking evergreen plant, with long, narrow leaves. The flower rises from the center of the plant to a height of three feet, and is covered with creamy-white, bell-shaped flowers; is perfectly hardy; blooms every season. Each, 50c.

---

**Climbing Shrubs**

**Henryi Clematis**—Creamy white; large, fine shape; free grower and bloomer. Each, 40c.

**Jackmanni Clematis**—Large purple flower; very hardy and showy. Each, 40c.

**Mad. Ed, Andre Clematis**—This is the nearest approach to a bright red Clematis, and has been called the Crimson Jackmanni. The plant is a strong, vigorous grower and very free in bloom. Color a distinct crimson red; a very pleasing shade and entirely distinct from all other varieties. Each 40c.

**Paniculata, Japan Clematis**—No introduction in recent years has met with such ready sale and given such perfect satisfaction wherever planted. It grows and thrives everywhere, and is a very rapid grower and a profuse bloomer. The flowers are pure white, borne in large clusters, converting the plant into a perfect mass of white. Its extreme hardiness, bright foliage and delightfully fragrant flowers serve to make this one of the finest hardy climbing plants in cultivation. Each, 25c.

**Hall’s Japan Honeysuckle**—This beautiful honeysuckle is almost evergreen, very strong and hardy growth. The flowers are delightfully fragrant, and bloom profusely from May until frost; a handsome and valuable vine. Each, 15c.

**Monthly Fragrant Honeysuckle**—Very rapid grower; blossoms nearly all summer; a favorite on this account; flowers red and yellow, and very fragrant. Each, 15c.

**Trumpet Flower**—A rapid growing vine with large trumpet-shaped scarlet flowers and handsome foliage. It is an excellent vine for covering unsightly objects. It is especially valuable for covering dead trees. Each, 15c.

**Virginia Creeper**—A native of rapid growth, with large luxuriant foliage, which in the autumn is of the most gorgeous and magnificent coloring. Each, 15c.

**Wisteria, Purple**—The flowers are large and double, purple in color; desirable for any position where you need a rapid climber and abundance of blossoms. Each, 15c.
Roses

Cultural Directions—In selecting a spot for a rose bed, do not choose one where the bushes will be shaded by trees or buildings. Sunlight is the very life of the rose. Roses are very partial to a clay loam soil, but will do well in any ordinary soil if well enriched with well-rotted barnyard manure. In preparing the bed, dig it up thoroughly to the depth of twelve or fifteen inches, as rose roots penetrate deep when they have a chance. In forming the beds, do not elevate them above the level of the ground surrounding, as they will suffer less from drought. After the plants have been set out, keep the soil loose to the depth of an inch or two by frequent stirrings. An occasional soaking with weak manure water is a great help to them.

American Beauty Rose

HYBRID PERPETUAL ROSES

Two Years, Strong. Each, 25c; $2.00 per 10.

Except As Noted.

American Beauty—The flowers of this variety are very large, beautiful in form and color and very double; color a deep rich rose. Each, 46c; 10 for $1.60.

Anne de Diesbach—Brilliant rose color, with long pointed buds and large, perfectly formed blossoms. A vigorous grower and a persistent bloomer. One of the best.

Alfred Colom—Brilliant carmine-crimson. One of the best.

Bonstetten—New rich maroon, very hardy and profuse bloomer.

Baroness Rothschild—Pink, one of the most beautiful of this color; blooms all summer.

Duke of Edinburgh—Bright crimson; very showy; one of the best bloomers.

Eugene Furst—Velvety crimson; one of the most beautiful dark red roses.

Frau Karl Druschki—A magnificent rose, called the White American Beauty, since it grows on long stems similar to the American Beauty, and produces immense, fine white flowers, four to five inches across. The stock is scarce and hard to get, but we have a limited supply on hand. Each, 49c; 10 for $5.00.

Gen. Jacqueminot—Brilliant crimson in color; large size; moderately full. Each, 38c; 10 for $2.50.

John Hopper—Bright rose with carmine center; one of the most hardy and best. Each, 25c; 10 for $2.00.

Marshall P. Wilder—Cherry-carmine. This rose blooms the entire summer. Each, 25c; 10 for $2.00.

Magna Charla—Bright pink, very strong grower; one of the best in its class. Each, 25c; 10 for $1.50.

Margaret Dickson—White, with flesh center; splendid cemetery variety. Each, 25c; 10 for $2.00.

Madam Plantier—Grows in fine, symmetrical, bushy form, and produces a great abundance of beautiful white flowers. Desirable for cemetery decorations.

Paul Neyron—Flowers of immense size, often five inches in diameter; color deep, clear rose; very fresh and pretty. Each, 30c; 10 for $2.50.

Ferdian Yellow—Deep golden yellow; double and very fine. Each, 25c; 10 for $1.50.

Urich Brunner—A splendid, strong, upright grower, with bright, healthy foliage. The flowers are of good size and form, with shell-shaped petals; one of the most abundant bloomers; color cherry-red.

HYBRID TEA AND TEA ROSES

Half Hardy.

The Roses included in this section are valued especially for their free and continuous blooming qualities, which render them particularly useful to plant in beds and groups for the ornamentation of the lawn or-to grow in the garden for a supply of cut flowers for decorative purposes.

The collection embraces several of the choicest Roses which can be recommended in the strongest terms to planters with the suggestion that they require better winter protection than do the Hybrid Perpetuals. The plants need to be well banked up with earth and covered with straw or evergreen boughs, while those planted in beds should also be protected with boards to keep off wet and moisture.

The extra care devoted to the Roses in this class will be amply repaid in the satisfactory flowers produced abundantly and continuously during the summer.

Vig.—Vigorous grower.

Mod.—Moderate grower.

Etoile de France, vig.—Velvety crimson, on stiff, erect stems, cupped form; continuous and free flowering. Very fragrant. Each, 50c; 10 for $4.00.

Gruss an Teplitz, vig.—Color scarlet shading to velvety crimson, very fragrant, a free grower and most profuse bloomer; handsome foliage, especially valuable as a bedding rose. We can recommend it as one of the choicest roses. Each, 25c; 10 for $2.00.

Kaiserin Augusta Victoria, vig.—An extra fine white variety, faintly blended with cream color; very large, full and double, almost perfect in form, and it continues beautiful even when fully expanded. Its fragrance is a combination of tea and magnolia, and is very delightful and distinct from that of any other variety. Beautiful glossy foliage; a vigorous grower and very free flowering, blooming at every shoot. Each, 45c; 10 for $4.00.

Killarney, vig.—Color flesh, shaded white, suffused pale pink flowers; large buds, long and pointed; and blooms profusely throughout the season. Each, 35c; 10 for $3.00.

La France, mod. or free—Raised from seed of a Tea Rose. Delicate silvery rose, changing to silvery pink; very large, full, of fine globular form; a most constant bloomer. One of the sweetest and most useful of all Roses. Each, 30c; 10 for $2.50.

Maman Cochot, vig.—Flowers large, full, clear carmine rose, shaded with salmon yellow. Plant very vigorous and free flowering. Each, 35c; 10 for $3.00.
ROSES—Continued

MOSS ROSES H. P.

Glory of Mosses—Large flower of pale rose color; a strong grower, with attractive, healthy foliage. Each, 25c.

Henry Martin—A splendid moss rose, with large globular flowers; rich, glossy pink in color, tinged with crimson; full and finely mossed. Each, 25c.

JAPANESE CREEPING MEMORIAL ROSE

Rosa Wichuriana—A very handsome rose; very valuable for covering rockeries, mounds or embankments; especially valuable for cemetery planting. It adapts itself readily to any soil, and does well under almost any conditions. The flowers are pure white, and appear in greatest profusion during the month of July, after the June roses are past. Each, 25c.

BABY RAMBLER

This is truly a wonderful rose, in shade and appearance it is like the Crimson Rambler, blood red in color. This rose is always in bloom; as soon as it gets in full leaf it puts out buds in the spring and continues blooming the entire season. Other roses bloom mostly in June, and then have a few scattering roses every month in the season, but the Baby Rambler has as many roses every month in the season as the Crimson Rambler has in June. If you want truly a novelty, one that is ready to give you a bouquet at any time and all times, buy the Baby Rambler. This rose is exceedingly hardy, being as hardy as the Crimson Rambler and will stand out of doors or may be used in the window. Each, 25c; 10 for $2.00.

H. P. TREE ROSES

A top graft. Best varieties grafted on good young stalks. The most beautiful novelty for a garden. Colored plate sent on request. White, red or yellow. Each, 75c; 10 for $6.00.

Crimson Ramblers in tree form, each, 75c; 10 for $6.00.

Baby Rambler Tree Rose—See outside back cover.

TREE PROTECTORS

Price, $1.50 per 100.

Our Improved Tree Protectors are made from wood veneers, ten inches wide by twenty inches long.

The Tree Protector should be soaked thoroughly in water before applying, to prevent splitting, and then wrapped about the tree. A wire or string should be fastened firmly around it to keep it permanently in its place.

They prevent injury by rabbits and mice, borers, insects, pests. Keep off hot sun and prevent sunscald. Keep off cold winter blasts. Prevent whishtree from cutting trees while cultivating.

Tree Protectors may be included in getting up a $10.00 order. We do not pay freight when ordered alone.

We are not liable for loss of stock from hail, drouth, fire, frost, disease or any other cause beyond our control. We aim to keep all trees true to name and are ready at all times to replace, upon proper proof, all trees that prove otherwise. But it is mutually understood in accepting orders, that we are not liable for a greater amount than was originally paid for the trees.
3 SPECIAL FLOWER OFFERS
These Flowers are our Most Beautiful and the Hardest for the Middle West. Note Low Prices.

THE BABY RAMBLER TREE ROSE
A top graft on a strong dog-wood stalk. The rose really blooms all summer, requires very little care. A fiery ball from spring till frost, one of our grandest ornamentals. Each 80 cents.
